

Junior Data Scientist | AI & Data Analyst

 github.com/minhhieu50050

- * Collaborated with partner ECV, IBM, CMC to test and validate an AI-powered chatbot for investment consultation and customer support in the securities sector.
- * Designed and executed test cases to evaluate chatbot performance, accuracy, and response quality.
- * Developed a scoring system to assess chatbot effectiveness and ensure continuous improvement.

- * Operated and monitored chatbot deployment, ensuring smooth functionality and optimal performance.
- * **Achievements:** Successfully completed POC for the chatbot, enabling brokers to retrieve information **30%** faster, deliver insights to clients **70%** more efficiently, reduce company costs by **20%**, and increase broker productivity in other strategic tasks by **15%**.

PDF Extraction with OCR and AI | Python, PyMuPDF, Tesseract, GeminiAI, Streamlit
Company Project

Dec 2024 - Jan 2025

- * Conducted research and utilized OCR (Tesseract) to extract text and metadata from PDF files.
- * Integrated GeminiAI models for AI-based keyword extraction and summarization, improving data analysis efficiency.
- * **Achievements:** Reduced document processing time by **80%**, eliminated the need for manual processing of PDF files by interns.

BrokerApp UX Dashboard | Power BI, SQL
Company Project

August 2024

- * Utilized SQL to extract and transform essential tables and columns, ensuring optimized data retrieval for analysis.
- * Designed and implemented efficient data transformation logic to enhance data quality and usability in reporting.
- * Developed an interactive UX-focused dashboard in Power BI, incorporating key user experience features:
 - Customizable filters and drill-through reports for in-depth user behavior analysis.
 - Real-time data updates reflecting the latest user interactions and trends.
 - Dynamic visualizations for tracking user engagement, session durations, average time per session and Bounce rate.
- * **Achievements:** Significantly improved user experience and engagement by providing actionable insights, leading to enhanced dashboard usability and feature adoption.

Investment Performance Dashboard | Python, Dash
Personal Project

Nov - Dec 2024

- * Converted an investment performance dashboard from Power BI to Python due to performance issues with a high number of users.
- * Developed the entire dashboard using **Dash**, ensuring smooth and efficient interactivity without lag.
- * Implemented all calculations and data transformations using Python, optimizing performance and reducing processing time.
- * Designed a responsive and interactive UI with real-time data updates, improving user experience and usability.
- * **Achievements:** Reduced report generation time by **80%**, eliminated lag issues.

Investment with Python | Python, Long Short Term Memory Model (LSTM)
Personal Project

July - Aug 2024

- * Utilized an LSTM model to predict market trends.
- * Applied portfolio optimization algorithms to maximize profits and minimize risks.
- * **Achievements:** Achieved **85%** model accuracy, increased portfolio returns by **6%**.

Social Listening | Python, Selenium, Airflow, Spark, HBASE
Personal Project

Dec 2023 - Jan 2024

- * Web Scraped data using Selenium from YouTube and Facebook, performed preprocessing, analysis, and saved data in an HBASE database (dataset over 10,000 rows).
- * Collaborated with the team to integrate machine learning algorithms, including Computer Vision and Emotion Detection, to identify sentiment polarity (positive or negative) in comments.
- * Utilized NLP models to train and identified over 40 posts with negative emotions.
- * **Achievements:** Reduced manual moderation efforts, improved brand monitoring effectiveness.

SKILLS

Programming Languages: Python (Data Processing, Web Scraping, Automation, API Integration, Data Analysis, Machine Learning), SQL, HTML

Developer Tools: VS Code, Git (Basic: Clone, Pull via Git Bash), Docker

Technologies: MySQL, Apache Airflow, Apache Spark, Apache Superset, Pydantic

AI&OCR: OpenAI API, Gemini API, PyMuPDF, Tesseract

OS&Data Analytics: Linux, Power BI

Automation Tools: n8n

LANGUAGES

English: TOEIC 705

Vietnamese: Native Speaker

Chinese: Basic - Studying
